

# SIMPLE DOWEL CHRISTMAS TREE

by Rubyellen Bratcher // CAKIES

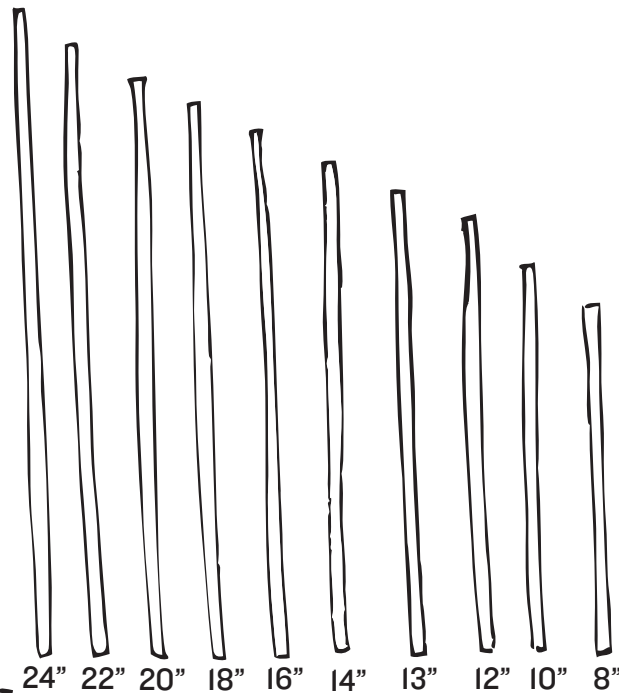

1. Using a 1" bit, drill a hole in the center of the wooden base.

12" x 12" x 1" wooden base

2. Using the 3/8" bit, drill the first hole 4" from the top and proceed to drill the remaining 9 holes 4" apart, but drill each following hole 90 degrees from the previous hole. The last hole should be 8" from the bottom of the dowel.

3. Cut dowels according to the designated measurements below.

4 - 3/8" x 48" poplar dowels cut down to the above measurements

4. Insert the 48" dowel into the wooden base, proceed to insert the remaining dowels from shortest to longest (shortest dowel into the top hole) onto the 48" dowel to create your wooden Christmas tree!
